CONCRETE • HAULING • TRENCHING • EXCAVATING

Re: 2022 Kirkwood Street Overlays

The City of Kirkwood has hired us to do improvements to multiple roadways. Concrete curb and gutters have been repaired and, the next steps are to roto mill the roadways, repair subgrade issues, and asphalt pave the roads.

This letter is to inform you that **STARTING NEXT TUESDAY** (possibly Wednesday), we will begin this next phase of work. The process below is meant to communicate how the work will affect you:

Step 1: During milling, you will be able to get in and out, with intermittent closures.

Step 2: After milling we will mark out base repair, and place cones around repair areas. Please look for these as a sign that the repairs will affect your access. If it does, it will be for about 24 hours.

Step 3: During paving, access will be limited throughout the day. Due to the high temperatures lately there may be a cool down period in the evening after paving. You may need to walk to your home from the nearest street for one evening, but should be able to get your cars later that night.

The diagram below shows that the work will be done in two phases to allow residents to park on adjoining streets. Please do not park on Phase A streets starting next Tuesday. When you see that the “Phase A” work is complete, please park on the newly paved roads so that we can complete our work on the “Phase B” streets.

Thanks in advance for your patience and cooperation. Please drive carefully and watch for workers.
