

ABOUT THE PROJECT

LONGVIEW BOULEVARD IMPROVEMENT PROJECT FACT SHEET

This project will analyze and recommend the best location for a sidewalk on Longview Boulevard between Taylor Avenue and Woodlawn Avenue and between Longview Boulevard and Woodlawn Avenue on East Essex Avenue. The project will also include resurfacing and restriping Longview Boulevard.

Residents and city leaders recognize the need for sidewalks to support safe and comfortable walking. Kirkwood's Bicycle and Pedestrian Plan, adopted in 2015, identified the need for a sidewalk connecting Longview Boulevard to sidewalks on Taylor and Woodlawn Avenues.

PUBLIC ENGAGEMENT

Before options are considered, the city is seeking public input. To share your insights about the pedestrian experience on Longview Boulevard and the best location for a sidewalk, please complete the [Longview Boulevard Survey](https://bit.ly/3P6L8hf) (<https://bit.ly/3P6L8hf>) and share your ideas at a public meeting to be scheduled in June.

SCHEDULE, PROJECT DESIGN

PHASE
01

EARLY SUMMER:
Engage the
Community/Conduct
Initial Survey Work

- Inform property owners and stakeholders of potential changes on Longview
- Public meeting and community survey on preferred location and features
- Initial survey work.

In June, residents will notice staff from engineering firm TWM in yards and on the street marking utilities with paint and flags and collecting topographic data. Residents are asked to take care not to disturb any of the markings if possible.

PHASE
02

MID-SUMMER:
Develop
Recommendations

- Complete topographic survey
- Use community input to determine sidewalk location and prioritize features
- Develop traffic calming plan
- Settle right-of-way with impacted property owners

PHASE
03

LATE SUMMER: Final
Recommendation

- Determine what, if any, traffic calming measures will be recommended
- Determine recommended location and notify the community

Depending on funding, the City plans to hire a construction contractor in early 2023. Construction is anticipated later in 2023.
