

Clean Energy

Kirkwood Electric has always been on the forefront of clean energy developments in Missouri. Kirkwood's membership in the Missouri Public Utility Alliance has enabled the department to partner with other municipal utilities to help develop utility scale wind and solar projects in the state. Take a look at a list of [MPUA projects](#) that are currently in operation.

Kirkwood Electric's Wind Power

Kirkwood Electric is still on schedule to receive 25 MW from the Clean Line Green Belt project. This project not only makes sense from an environmental point of view, but also saves Kirkwood Electric customers significant dollars over the next 20 years. Stay tuned as Kirkwood continues to be a leader in the advancement of clean energy.
