## Monthly Progress Report

While we always continue to do our normal maintenance, repairs and taps, we have focused time on prepping materials for our upcoming main relocations on Manchester Road. We also continued to prep 1 Park's holding tank for the new mixing system.

### Did You Know?

Water main breaks can happen for lots of different reasons; age, extremely dry or wet conditions, age and harsh temperature changes along with age, just to name a few. A little humor there, but **aging** systems are a BIG reason water mains can break.

### Upcoming Projects

While we have mentioned the upcoming Manchester water main relocations before, we would like to keep it fresh so you don't forget. We will be sure to notify residents of any scheduled service disruptions 24hrs beforehand as we move forward with this project.

### Spotlight

Greg Davis has been with us for about 6 years. He has a large family and loves spending time with them.

### New Mixing System at 1 Park Tank:

Have you ever wondered what it looks like inside of one of our water tanks?
