

**April, 2021**

## Monthly Progress Report

While our need for repairs to water mains, fire hydrant and valves have slowed due to the mild weather, we have been hard at work out on Manchester Road prepping and installing materials for the main relocations. We have installed 12 new tapping sleeves, tees and valves along with completing one of seven of the main relocations.

### Did You Know?

Did you know that every time we have a new water main installed, we go through a very particular process disinfecting and bacteria testing the water in the new main before it is sent to your home to ensure safe and clean drinking water?

### Upcoming Projects

The work we are doing on Manchester will continue through June. We are moving right along and are on schedule!

### Manchester Road – Replacing 12 Water Main Valves:
